Features of Lithium Iron Phosphate LiFePO4 Batteries

MINIMAL SELF-DISCHARGE

Less than 2% self-discharge per month, which means more power when you need it.

FASTER CHARGING

Charges much faster than conventional sealed lead-acid batteries, giving you access to reliable power quicker.

EASY INSTALLATION

Canbat lithium iron phosphate batteries are designed to be drop-in replacement for sealed lead-acid batteries.

HIGH DISCHARGE RATE

Ability to deeply discharge the battery at a high rate of discharge while maintaining a high energy capacity.

ENVIRONMENTALLY FRIENDLY

Toxic-free and acid-free, which makes them environmentally friendly and you can install them in any direction.

MORE USABLE CAPACITY

Lithium iron phosphate batteries provide up to 100% of usable energy, which means you can discharge the battery entirely.

LIGHT WEIGHT

Lithium batteries are 60% lighter than sealed lead acid batteries, making installing and moving the batteries easier and faster.
