## Features of Lithium Iron Phosphate LiFePO4 Batteries

## 6 MINIMAL SELF-DISCHARGE

Less than $2 \%$ self-discharge per month, which means more power when you need it.
$\rightarrow$ FASTER CHARGING
Charges much faster than convential sealed lead-acid batteries, giving you access to reliable power quicker.

## EASY INSTALLATION

Canbat lithium iron phosphate batteries are designed to be drop-in replacement for sealed lead-acid batteries.
HIGH DISCHARGE RATE
Ability to deeply discharge the battery at a high rate of discharge while maintaining a high energy capacity.

## ENVIRONMENTALLY FRIENDLY

Toxic-free and acid-free, which makes them environmentally friendly and you can install them in any direction.
MORE USABLE CAPACITY
Lithium iron phosphate batteries provide up to $100 \%$ of usable energy, which means you can discharge the battery entirely.

## LIGHT WEIGHT

Lithium batteries are $60 \%$ lighter than sealed lead acid batteries, making installing and moving the batteries eaiser and faster.
