## DEEP CYCLE BATTERIES - CDC

### DEEP CYCLE BATTERY APPLICATIONS

CDC is our range of Deep Cycle AGM batteries. They are designed for regular use applications that require a constant flow of power during longer periods of time. The most common applications for Deep Cycle batteries include:

- Wheelchairs & scooters
- Floor scrubbers
- Lawn & garden equipment
- Marine & RV house power
- Trolling motors and off Carts.

Volts available: 2V, 6V and 12V  
Capacities: from 12 Ah up to 3,000 Ah  
Operating temperature: from -20°C to +55°C  
Design life: 15 years

### BATTERY FEATURES

Deep Cycle batteries offer exceptional performance considering their long design life and their ability to withstand deep discharges. They are the best AGM battery technology for power-hungry applications that will frequently cycle the battery (discharged and recharged). Deep Cycle batteries are maintenance-free and spill-proof, so you can install one in your scooter and off you go worry-free. Best of all, all of our CDC batteries are backed-up with Canada's best 12 months replacement warranty.

Here is a sample selection of the batteries available in the CDC series, please visit [www.canbat.ca](http://www.canbat.ca) for the full range.

## EXCEPTIONAL DEEP CYCLING PERFORMANCE

If you're mowing the lawn, you want your electric mower to have power till you're entirely done. If you're going to the grocery store in your scooter, you need to get there and back without your battery dying. If you're playing golf, you want to play without having your golf cart dying during the game and getting stuck in the fairway. All of these applications require you to have a reliable battery with deep discharge properties. Deep Cycle batteries allow such power-hungry equipment to run for hours, worry-free. Canbat Deep Cycle batteries are designed in Canada and offer exceptional deep cycling performance.
