

GENERAL PURPOSE BATTERIES - CBL

GENERAL PURPOSE APPLICATIONS

CBL is our range of sealed lead acid batteries designed for general purpose applications, such as the following:

- Alarm systems
- Emergency lighting
- Medical equipment
- Telecommunications
- UPS

Volts available: 2V, 4V, 6V, 8V and 12V

Capacities from: 0.8 Ah up to 250 Ah

Operating temperature: from -20°C to +55°C

Design life: 5 years

CANADA'S BEST REPLACEMENT WARRANTY

We are so confident in our batteries that we offer the best warranty in Canada. We will replace your CBL battery if it stops working within the first 12 months, no questions asked. Our CBL batteries are designed in Canada, allowing us to make quality our number one priority. Install a Canbat battery in your alarm system today and invest in the peace of mind you deserve.

Here is a sample selection of the batteries available in the CBL series, please visit www.canbat.ca for the full range.

GENERAL PURPOSE BATTERY

General Purpose AGM batteries are the most popular battery type among all lead acid batteries. They are used in home applications and in business applications. For example, if you have a burglar alarm system at home or at work, then you probably have a General Purpose battery installed in it for back-up power. If you live in an apartment or work in a building, there are General Purpose batteries installed all around you. Some examples of where these batteries are installed would be in exit signs, in emergency lights and in fire alarms. The purpose of these batteries is to provide back-up power during a power outage. For instance, if there is a fire in a building and the power goes off, having functional emergency exit signs and emergency lights is critical for a safe evacuation plan. Canbat offers one of the highest performing General Purpose AGM batteries in Canada. Replacing your batteries regularly will help keep everyone safe during an emergency.
